- Coursera -- Foundations for Big Data Analysis with SQL
- Coursera -- Data Warehouse Concepts, Design and Data Integration
- Udemy -- React Native, The Practical Guide
- Coursera -- Build a Full Website using WordPress

PROJECTS:

- **Final Year Project - AlterMeds (Cross Platform Mobile App):** A key problem which our application address is the non-availability of certain medicine at the time of an accident, disease or injury, this problem will be solved by recommending alternatives to medicines based on their chemical compositions, therefore if the prescribed drug is not available at a pharmacy an alternate with same chemical composition could be issued. Moreover, the customers can book appointment with Doctors. There's a Rider module in our application which helps delivery riders to deliver and communicate with the customers and an Admin Panel where the system administrator can apply CRUD operations on Riders, Doctors and Medicine Inventory.
- **Database Systems - Life-Share (Blood Donating Android App):** The App's purpose is to make the blood donor and receiver meet on one platform in case of an emergency.

EXTRA-CURRICULAR ACTIVITIES:

- **Prominent Senior Member – Music House:** Learned to play the lead guitar while communicating and collaborating with fellow musicians.
